

Indonesia jr power systems

How will Indonesia's power system work?

pathways for Indonesia's power system. We have focused on the Java-Bali and Sumatra systems, which is where the majority of the population lives and about 90% of the electricity is consumed. By mid-2020, Sumatra and Java will be connected via a submarine cable, thereby integrating

How much money does IPG invest in Indonesia's power sector?

This financial commitment aims to expedite the decarbonisation of Indonesia's power sector, striving for ambitious cuts in emissions. Half of the funds are pledged by IPG members, further catalysing at least USD 10 billion in private finance, supported by the Glasgow Financial Alliance for Net Zero Working Group.

What is the JETP & how will it help Indonesia?

The JETP aims to mobilise USD 20 billion over the next 3-5 years to help Indonesia pursue an accelerated just energy transition that supports a trajectory that keeps a warming limit of 1.5°C above pre-industrial levels within reach.

Does Indonesia have a good solar system adequacy?

System adequacy has been assessed using a reserve margin metric, but this method is not the best fit for a system with a high contribution from solar and wind resources. Indonesia currently sets high reserve margin criteria, contributing to the overbuilding of power plants.
