How many substations will Siemens Energy build in Iraq?

Siemens Energy is working to install the 13 substations that the company is building in Iraq. The substations will strengthen the country's power infrastructure as part of the company's roadmap for electrification of the New Iraq.

What is Iraq's Energy Plan?

The plan includes several key pillars that support the government's goals to enhance Iraq's power infrastructure, as well as promote decarbonization and energy sector diversification.

Is foreign help enough to fix Iraq's energy problems?

Foreign help is not enough to fix energy issues, domestic reform is necessary. This past July, Iraq and France's TotalEnergies finalized the Gas Growth Integrated Project, a \$27 billion energy deal aimed at Iraq's natural resources and improving the country's electricity supply.

How will substations affect Iraq's power infrastructure?

The substations will strengthen the country's power infrastructure as part of an agreed roadmap for the electrification of the New Iraq. When fully commissioned, the substations will help to deliver enough power to the national grid equivalent to the electricity needs of more than two million citizens.

Will Iraq's power sector be more efficient?

Thus, according to local energy experts, the power sector will be more efficient. The Siemens Energy Iraq Managing Director points out the inefficiencies in Iraq's power grid, which amount to 50 percent in losses. "Even if we just improve on the efficiency side," he says, "the delivery of electricity to Iraq's homes and factories will be improved."

Will Iraq rebuild its power sector?

In October 2018, a memorandum of understanding was signed with Iraq to rebuild its power sector in three phases within four years from financial close. "There was a need," says Siemens Energy Iraq Managing Director Musab Alkateeb, who hails from the capital of Baghdad.

1972 severed ties with Western energy companies, cutting the country's oil industry off from Western investment and expertise; that isolation, together with subsequent decades of war and crippling sanctions, left Iraq's economy and energy infrastructure in shambles. Desperate
