

Who buys electricity in Palestine?

It buys electricity from the Palestine Power Generation Company (PPGC), IEC, and other neighboring countries, which is then distributed to the six Palestinian district electricity distribution companies. Structurally, Palestine does not have sufficient distribution companies or systems.

How does a difficult access to energy affect the Palestinian government?

Moreover, the difficult access to energy reflects on the PA debt sustainability, its capacity to ensure uninterrupted provision of basic services to its citizens in view of the Palestinian statehood, and critically affecting the level of response to the Gaza water crisis.

What is the future consumption of electricity in Palestine?

Future consumption of electricity is expected to reach 8,400 GWh by 2020 on the expectation that consumption will increase by 6% annually. The Palestinian Electricity Transmission Company (PETL), formed in 2013, is currently the sole buyer of electricity in the areas under Palestinian Authority (PA) control.

What does the Palestinian Energy Authority do?

The Palestinian Energy Authority is the agency accountable to the President, responsible for: Setting the legal, institutional, economic, financial and technical basis for system development; Coordinating the sector, policy and system development, generation, transmission, distribution, tariffs and regulation;

How much electricity does Egypt supply to the Gaza Strip?

Egypt supplies merely 17 MW of electrical power to the Gaza Strip while 20 MW is supplied to Jericho by Jordan's state-utility firm. Exploitation of renewable energy resources is required at a mass-level so as to ensure a cheap and sustainable source of energy to the Palestinians.

What is the potential for solar energy in Palestine?

There is high potential for solar energy in Palestine, with a daily average solar radiation of 5.4 kWh/m² which should encourage its use for mass applications like cooking, industrial and domestic heating, water pumping, rural electrification, desalination etc.
