

How can Iran achieve long-term electricity targets?

We can conclude that Iran's electricity capacity is high and this can help to increase the share of wind energy in the total primary supply of energy. To achieve long-term electricity targets, it is necessary to provide incentives to private investors and to put in place clear and stable policies.

How can Iran improve the energy system?

We can conclude that Iran has a significant potential capacity for crude oil and natural gas reserves, its transport and storage. It can increase the weak flexibility of the energy system by constructing more transition lines and braking swap with its neighbors.

How much energy does Iran use in 2021?

Iran's economy consumed an estimated 11.6 quadrillion British thermal units of primary energy in 2021, making it the highest energy consumer in the Middle East.

Can Iran's future be planned based on recognized and predictable electricity costs?

The future of Iran's economy can be planned based on recognized and predictable electricity costs because that electricity comes from indigenous energy and is free from all the security, political, economic and environmental problems associated with oil and gas.

Could 1m household solar power plants be set up in Iran?

56 Tehran Times, 'There is possibility to set up 1m household solar power plants in country', August 19, 2022; Fitch Solutions, Iran Power Report, Q4 2022; page 11.

What are Iran's Energy Priorities?

For example, based on various indicators, Manzoor and Rahimi showed that Iran's priorities for construction and investment in electricity generation and power plants in the future include, in order, wind energy, hydropower, photovoltaic energy, combined-cycle power plants, nuclear power plants and thermal power plants. 4.

According to SATBA's resource assessments, Iran has the capacity to produce over 20,000 megawatts (MW) of wind energy and 800 MW of biomass energy. These rich solar and wind resources have the potential to reshape the nation's energy landscape and position Iran as a renewable energy leader in the Middle East.
