

Why is Iraq launching a solar energy project?

"The solar energy project contributes to increasing the production of electrical energy, to supply the system with clean renewable energy," the government added. "It is also one of the first pilot projects in Iraq, which is implemented for the first time." No more technical or financial details on the new scheme were released.

Does Iraq have solar power?

And UAE-based developer Masdar signed an agreement with Iraq's government in June to build a 2 GW solar project. According to the International Renewable Energy Agency, Iraq has just 216 MW of installed PV capacity, despite having huge solar potential. No additional solar power has been deployed in the country over the last three years.

What does a solar company do?

Supply and distribution of solar and wind power equipment to the private and government sectors, Professional team with high expertise, design and installation of solar energy systems (household, commercial, industrial) A team of experts supervises continuous studies and deals with all ideas and plans and provides consultations in this field.

In Iraq, we have an interest in the Halfaya oil field (in production), as well as a stake in an exploration block. We are developing the GGIP project (Gas Growth Integrated Project), which involves recovering flared gas from three oil fields to supply power stations with gas and building a seawater treatment plant to maintain oil field pressure and increase ...
