

Is foreign help enough to fix Iraq's energy problems?

Foreign help is not enough to fix energy issues, domestic reform is necessary. This past July, Iraq and France's TotalEnergies finalized the Gas Growth Integrated Project, a \$27 billion energy deal aimed at Iraq's natural resources and improving the country's electricity supply.

Does Iraq have a good energy system?

Today, the majority of Iraq's population has grown up in a system that has promised to deliver on energy improvements, but changes in the standard of living have rarely materialized.

Does Iraq have a reliable electricity grid?

Now, two decades after the 2003 US invasion, Iraq has failed to see improvements in the electricity infrastructure. Although the disparity between supply and demand is widening due to population increase and rising temperatures, corruption remains the largest obstacle to a reliable electricity grid.

Can Iraq achieve energy self-sufficiency without regional aid?

However, the path to energy sufficiency remains a considerable challenge for Iraq even with regional aid. Without domestic reforms to address the underlying causes of the energy crisis, Iraq's journey towards achieving energy self-sufficiency is still a considerable distance away.

Does Iraq have natural gas?

Iraq's proven gas reserves are the twelfth-largest in the world, but the country lacks the means to efficiently capture natural gas and leverage the resource into electricity. The country flares huge quantities of methane gas associated with oil and gas extraction.

How will liquefied gas & condensates affect Iraq's Treasury?

Gas gathering, compression, central processing and more than 400 km of pipelines are part of the plan. Ahmed Imad Al-Mohsen, RASEP's Business Development Director said exports of liquefied petroleum gas and condensates alone could bring in \$100 million US dollars to the Iraqi treasury each year.
