

Iraq satec powerful solutions

Who is SATEC?

SATEC is a developer and manufacturer of specialty solutions [buzzword] for power measurement and power quality monitoring.

What services does SATEC offer?

SATEC's U.S. and Israel branches also provide billing as a service, invoicing users and sub-tenants on behalf of commercial property owners and managers.

Is SATEC a private company?

With headquarters in Jerusalem, Israel and subsidiaries in Union, New Jersey and in PRC, SATEC is a privately owned company. SATEC was first founded in 1987 as a technological business incubator by Prof. Herman Branover.

What is a SATEC calibration lab?

The SATEC calibration lab is ISO 17025 certified for accuracy testing. The idea behind these first products was to design what later on would be referred to in the industry as a "smart panel", which implies connectivity and transmission of breaker status and power parameters and enabling control of loads via remotely operated relays.

How many countries does SATEC operate in?

SATEC operates in over 60 countries and has dedicated recognized self-branded SATEC partners in several of them. For the Russian market and Indian market, SATEC's partners have established local assembly lines to facilitate logistics and specificity of local demand.

Who is Hitec exports?

In 2009 SATEC appointed Hitec Exports to be a distributor in the UK. SATEC is a global leader in the research, development and manufacturing of energy management solutions. With two decades of rich experience in energy management, our team has the technological expertise to deliver flexible solutions for customer applications worldwide.

A Unique Segment. When it comes to energy management, the public sector is quite unique within the range of energy consumers. Industrial facilities have a clear demand for lowering energy spending which is often the largest ...

SATEC is a developer and manufacturer of specialty solutions [buzzword] for power measurement and power quality monitoring. The company's range of products includes traditional 3-phase power meters for real-time power measurement and data-logging, revenue meters (electricity meters), power quality analyzers and a software suite for energy management and billing.
