Our experienced team will work with you to design the best solar storage system for your home, and can assist with your SEAI Grant application.

What are solar panel batteries?

Solar panel batteries, often referred to as solar batteries or energy storage systems, are devices that store excess electricity generated by solar panels for later use. You can use this stored energy to power your house at times when your photovoltaic systems do not generate adequate electricity, including nights, power outages, and cloudy days.

What is solar battery storage?

The main advantage of solar battery storage is the ability to take the energy generated by Solar Panels during the day and store it to power your home in the evening and overnight. Through our relationship with House 2 Home, we are excited to afford Energia customers a tailored solution for your home.

Can a solar battery be used in a home solar-plus-storage system?

Energy storage technology has been around for several decades now, but solar-powered batteries used in home solar-plus-storage systems are relatively new to the market. Installing a solar battery - a high-tech storage system - can be the ideal choice for homeowners looking to reduce energy costs to a minimum.

With the SEAI Home Energy Upgrade Grant of up to EUR3,000 for our standard 4kw system with battery storage, a move to renewable energy has never been more affordable. Irish energy prices are on the increase, and with our Solar PV ...

How much do solar batteries cost? Solar batteries can add between EUR1,500-EUR4,000 to the cost of solar

panels. A number of things contribute to the cost, including: Capacity: The more energy your battery can store, the more expensive it will be. An 8kWh battery could be sufficient for an average, 3-bedroomed home.
