

What are the biggest solar projects in Italy?

The biggest solar projects in Italy include the Troia Solar farm, which is operational from 2020 and has a capacity of 103 MW. European Energy built this plant in Apulia, close to Foggia.

How important is solar power in Italy?

Annual and cumulative installed photovoltaic capacity (in MW) since 2000. Solar power is an important contributor to electricity generation in Italy, accounting for 11.8% of total generation in 2023, up from 0.6% in 2010 and less than 0.1% in 2000.

What makes SIG a leading solar energy company in Italy?

Our team has built 50 MWp grid-connected solar plants across Italy and has consequently emerged as a leading solar electricity operator in Italy. Our annual power generation is 72 GWh per annum. Thanks to the enormous experience of our renewable energy and finance teams, SIG has become one of Italy's leading solar energy production companies.

Why should you choose a solar company in Italy?

They are involved in various activities such as the installation of solar photovoltaic systems, development of new projects, and offering energy solutions. The presence of these established companies, with their extensive expertise and resources, plays a crucial role in propelling the growth of the solar energy market in Italy.

How much solar power does Italy have?

Total installed solar power capacity in the country reached 30.3 GW at the end of 2023. Current (2023) government plans are targeting solar PV capacity to rise to 79 GW by 2030. Like most countries, solar power usage in Italy was minimal before the 21st century.

What is concentrated solar power in Italy?

Italy currently maintains various concentrated solar power (CSP) projects. Concentrated solar power plants concentrate solar energy into single points of collection with, for instance, mirrors, to maximise energy capture. Four types of CSP technologies are currently available on the market.

GreenIT continues its growth in renewable energy with an additional 140 MW portfolio of new solar photovoltaic plants developed by Galileo. The projects will be built in three regions in Southern, Central and Northern ...

In 2020, the company completed the acquisition of the Spanish solar operator Renovalia Energy Group. In Italy, it holds a portfolio of over 300 solar plants spread across 17 regions, with a capacity exceeding 850 MW. In Spain, it operates 10 photovoltaic plants with a combined capacity of over 190 MW.
