

What is a central battery system?

The central battery system serves for the battery-backed control and emergency supply of an emergency lighting system. The functions of the individual circuits are defined with the help of a user-friendly parameterization system. Requirements: Electronic ballasts/modules of type CG (CEWA GUARD) must be used.

Is CEAG notlichtsysteme GmbH liable?

Attention! CEAG Notlichtsysteme GmbH will not assume any liability and/or warranty for shortcomings relating to the supply and installation of CEAG safety lighting systems and luminaires that may arise due to other standards and regulations prescribed for or applicable to overall installation packages of which CEAG products form part.

What if a central battery system is supplied without a battery?

When central battery systems are supplied without battery of the type of battery is unknown the tripple charge-voltage is set up with the factory default of 247.8V at +20°C (means 2.29 V/Z). According to the type of battery the tripple charge-voltage must be fitted at face. Isolate battery circuit.

Eaton's ZB-S is an emergency lighting central battery system that provides reliable power supply (230V AC/220V DC) to safety and exit luminaires. Automatically testing itself, the ZB-S individually monitors each CG-S luminaire (up to 20 per circuit) through the power supply cable alone. Featuring Eaton's STAR technology, ZB-S allows for the switching mode of every connected ...

CEAG ZB-S central battery system. ZB-S central battery system according to EN 50171 and BGV A3 for supply of 230V / 216V AC/DC safety and escape sign luminaires. Suitable for safety lighting systems according to DIN VDE 0100-718, DIN EN 50172 and V DIN V VDE 0108-100. With automatic testing device and single luminaire monitoring with individual ...
