Will New Jersey generate 11 GW of wind energy by 2040?

Under Governor Murphy's leadership, New Jersey has established an ambitious goal of generating 11 GW of electricity from offshore wind energy by 2040 as part of the State's Energy Master Plan to transition to 100 percent clean energy by 2035. Although

Will New Jersey's New wind projects reinvigorate green energy push?

The state was dealt a blow last year when a developer canceled plans for wind farms off its coast. New agreements could reinvigorate the green energy push. New Jersey's efforts to establish a foothold in the offshore wind industry was buoyed Wednesday when it announced two new projects. Wayne Parry/AP

How does New Jersey support offshore wind projects?

New Jersey is a national leader, providing support for infrastructure projects of national importance, like the NJ Wind Port, and awarding offtake agreements to several offshore wind projects. Learn more below. Download pdf of the Offshore Wind North and Mid-Atlantic Lease Area Map

Why did the New Jersey Board of Public Utilities cancel two projects?

The decision by the New Jersey Board of Public Utilities came on the heels of a Danish developer's move last year to cancel two projects slated to serve the state. The cancellation dealt a major blow to Democratic Gov. Phil Murphy's climate and clean energy goals and raised serious questions about the future of offshore wind in the United States.

Is the future of offshore wind in New Jersey Strong?

"The January 2024 awards are undeniable proof that the future of offshore wind in New Jersey is as strong as ever." The Wind Institute for Innovation and Training coordinates and galvanizes cross-organizational workforce development, education, research, and innovation efforts.

Through its NJCEC projects, JCP& L is helping modernize New Jersey's energy grid by upgrading existing high-voltage transmission infrastructure and enabling the state to handle the growing demand for electricity now and for years to come. The work will enhance JCP& L's ability to deliver power efficiently and reliably and connect new sources ...
