

Kiribati enersys genesis

What is a Genesis Xe battery?

Genesis XE batteries are manufactured with Thin Plate Pure Lead(TPPL) technology,packing enormous power in a smaller footprint,making them ideal for custom applications where space is of the utmost importance. Genesis XE batteries are found in alternative energy applications such as solar and wind power,and Hybrid Electric Vehicles (HEV).

Are Genesis NP batteries reliable?

Genesis NP batteries feature heavy-duty thick lead calcium grids for years of dependable performance. The high energy density design,factory sealed case and leak proof construction ensures that these rechargeable sealed lead acid batteries are extremely reliableand virtually maintenance-free. Request a Quote

What is a Genesis EP battery?

Premium high performance Genesis EP batteries are manufactured with Thin Plate Pure Lead(TPPL) technology,packing more power into a smaller footprint. Genesis EP batteries are suitable for a wide range of physically demanding applications and safe for human environments such as offices and hospitals. Request a Quote

How long do Genesis Xe batteries last?

Genesis XE batteries also feature a 2-yearshelf life at 77°F (25°C) and superior deep discharge recovery. Genesis XE batteries manufactured with TPPL,packing enormous power in a smaller footprint,ideal for custom applications where space is of utmost importance.

How often should I recharge my EnerSys Genesis battery?

GENESIS has a shelf life more than twice that of conventional lead batteries. To assure maximum reliability,EnerSys recommends that all stored batteries be recharged (boost charged) once every 24 monthsor when the open circuit voltage drops to 12.00 volts per battery,whichever occurs earlier.

Does EnerSys have a lead-tin battery?

Fastest recharge - EnerSys' pure lead-tinchemistry allows GENESIS®; to offer the shortest recharge efficiency of any sealed-lead battery on the market. With pure lead-tin,you can achieve a 95% state of recharge in less than one hour - without loss of capacity or electrolyte using conventional constant-voltage charging techniques.

Akumulatory Genesis EP Wysokiej jako?ci akumulatory Genesis EP s? wykonane w technologii cienkich p?yt z czystego o?owiu (TPPL), co zapewnia wi?ksza? moc na mniejszej powierzchni. Akumulatory Genesis EP s? odpowiednie do szerokiego zakresu wymagaj?cych fizycznie zastosowa? i s? bezpieczne dla ?rodowisk ludzkich, takich jak biura czy szpitale.

Genesis NP Las bater?as Genesis NP cuentan con rejillas gruesas y robustas de plomo-calcio para ofrecer un rendimiento fiable durante a?os. Su dise?o de alta densidad energ?tica, su carcasa sellada en f?brica y su construcci?n a prueba de fugas garantizan que estas bater?as selladas de plomo-?cido recargables sean extremadamente fiables y casi no necesiten ...

Today, Genesis EP TPPL technology can be found in applications as diverse as electronics, medical equipment, telecommunications, lawn and garden equipment, computer backup and UPS applications. the TPPL technology ...

Bater?as Genesis EP Las bater?as de alto rendimiento Genesis EP se fabrican con la tecnolog?a de placas delgadas de plomo puro (TPPL) para ofrecer m?s potencia en menos espacio. Las bater?as Genesis EP son adecuadas para numerosas aplicaciones f?sicamente exigentes y son seguras para entornos humanos como oficinas y hospitales.

The EnerSys Genesis G16EP is found in applications as diverse as electronics, medical equipment, telecommunications, renewable energy, and providing an Uninterruptible Power Supply (UPS). In addition to its superior performance characteristics, the Genesis EP battery non-spillable design allows for mounting in any position (except inverted) and ...

*Reference EnerSys Publication Genesis NP H Application Manual Storage o Always store battery in a fully charged condition o If battery is to be stored for a long period, apply a recovery top-charge every 6 months o Store batteries in a dry and cool location Temperature

The Genesis XE battery has a more rugged design, including a metal jacket, allowing it to be ideal in harsh environments such as heat and shock and vibration applications. Genesis XE batteries also feature a 2-year shelf life at 77°F (25°C) and superior deep discharge recovery. Request a Quote. Rugged construction

Genesis® NP As baterias Genesis ® NP têm grades de chumbo-cálcio grossas para serviço pesado, proporcionando anos de desempenho confiável. O projeto de alta densidade energética, a cargaça selada de fábrica e a construção à prova de vazamentos garantem que essas baterias de chumbo-ácido seladas recarregáveis sejam extremamente confiáveis e praticamente sem ...

All Genesis EP and XE batteries are recognized as UL components. 1.4 Non-halogenated plastics As the world becomes more environmentally aware, EnerSys® is striving to provide the most environmentally friendly products possible. With this in mind, we are proud to say that the plastics used in our Genesis battery line are non-halogenated and

Batteries Genesis® EP Les batteries Genesis ® EP hautes performances sont fabriquées avec la technologie TPPL (Thin Plate Pure Lead, plaques fines en plomb pur) qui leur procure une plus grande puissance avec un encombrement réduit. Les batteries Genesis EP conviennent à une large gamme d'applications exigeantes au niveau des contraintes physiques et peuvent être ...
