

Where will a solar plant be built in Kosovo?

The solar plant is planned to be built in southwestern Kosovo and to come online next year. The CEO of KOSTT, Mustafa Hasani, left, and the director of Solar Energy Group Europe, Egbert Schnuse. Image: KOSTT

When will Kosovo's first large scale solar plant be built?

The plant is scheduled to begin commercial operations in 2022. No further details were revealed on the project. When built, the plant will be Kosovo's first large scale solar park. The Kosovo government has made several attempts to support small sized and utility scale solar in the past.

How much solar power does Kosovo have?

Kosovo had just 7 MW of installed PV capacity at the end of 2019, according to the International Renewable Energy Agency. The country recently raised its renewable energy target to an additional 400 MW of capacity by 2026. That would be enough to meet a quarter of its power demand and would reduce dependence on aging coal-fired power plants.

Where does Kosovo get its electricity?

Most of Kosovo's electricity is supplied as imports or from two lignite-fired thermal power plants, the 40-year-old Kosovo A Power Station (with a 345 MW generation capacity) near Pristina, and the upgraded, 27-year-old Kosovo B Power Station (540 MW) in Obiliq. Is Kosovo paving the road for a greener and environmentally friendly future?

“By harnessing the potential of clean energy, we are paving the road for a more greener and environmentally friendly future,” Kosovo's Prime Minister Albin Kurti said during a ceremony marking the construction of the plant close to western town of Gjakova.

Is Kosovo's feed-in tariff scheme complying with European state aid regulations?

In December, for example, Kosovo's State Aid Commission (KNSH) deliberated that the feed-in tariff scheme for PV installations not exceeding 3 MW in size, introduced by the country's Office of the Energy Regulator (ZRRE) in late November, was not complying with European state aid regulations.

Att investera i solenergi hos Ensolar är en smidig och bekymmersfri process, och vi vill gärna det enkelt för dig att dra nytta av fördelarna med solceller. Vårt steg-för-steg-guide är utformad för att ge dig insikt i hur en solcellsinstallation med en komplett helhetsleverantör, med egen expertis i varje led, faktiskt går till ...
