

How much energy does Kyrgyzstan produce?

Kyrgyzstan's total primary energy supply (TPES) was 3.9 million tonnes of oil equivalent (Mtoe) in 2015 and reached 4.6 Mtoe in 2018. Total final consumption (TFC) totalled 4.2 Mtoe in 2018, and is growing rapidly (+72% since 2008). In 2018, domestic energy production was 2.3 Mtoe, consisting mostly of hydropower (53%) and coal production (37%).

Who has power in Kyrgyzstan?

Executive power in Kyrgyzstan lies with the government, its subordinate ministries, state committees, administrative agencies and local administrations. In the energy sector, the government: Grants and transfers property rights, and rights for use of water, minerals and other energy resources.

Which sector consumes the most energy in Kyrgyzstan?

Residential sector is the largest energy consuming sector in the country, followed by transport and industry. Electricity consumption per capita, although sometimes limited by power outages, increased by more than 45% from 2010 to 2018. Renewables contribute to 27% (2018) of Kyrgyzstan's energy mix.

Is Kyrgyzstan a member of the World Trade Organization?

Kyrgyzstan has been a member of the World Trade Organization since 1998, and it joined the Russian Federation ("Russia"), Belarus, Armenia and Kazakhstan in the Eurasian Customs Union in 2015. The energy sector represents 4% of GDP and 16% of industrial production, and hydropower accounts for two-thirds of energy production.

Is Kyrgyzstan a member of the Eurasian Economic Union?

Kyrgyzstan also became a member of the Eurasian Economic Union (EAEU) in 2015. Kyrgyzstan's total primary energy supply (TPES) was 3.9 million tonnes of oil equivalent (Mtoe) in 2015 and reached 4.6 Mtoe in 2018. Total final consumption (TFC) totalled 4.2 Mtoe in 2018, and is growing rapidly (+72% since 2008).

Why is Kyrgyzstan using more electricity than normal?

Due to the arrival of winter and a drop in temperatures, the population is using more electricity than normal," Kyrgyzstan's energy ministry said in a statement. The landlocked, mountainous country gets some 90 percent of its electricity from hydropower, making it especially vulnerable to water shortages.
