

Who is heliostorage?

Finnish Cleantech company Heliostorage is receiving financing from the Nordic Green Bank to scale up its emission-free seasonal thermal energy storage solution in Europe. Heliostorage is a Finnish cleantech company that has developed an energy-optimisation system that enables energy independence for heating that is free of emissions.

How does heliostorage work?

World Leader in Efficient Seasonal Thermal Energy Storage | The Heliostorage solution captures and stores energy from the summer sun to maximize heat pump efficiency regardless of time of year, producing the required volume of thermal energy using a fraction of the electricity.

What is heliostorage thermal energy storage?

Heliostorage seasonal thermal energy storage captures heat in solar thermal collectors, mainly during spring and summer, and this is either used directly as heat or transferred and stored in a patented configuration of shallow boreholes in the earth, turning the soil into a thermal battery.

Why should you choose heliostorage?

Heliostorage provides innovative technology to optimise the efficient storage and delivery of thermal energy for low-cost heating and cooling. With a strong commitment to sustainability, Heliostorage is dedicated to helping customers navigate the challenges of rising energy costs and emissions reduction targets.

Why does NEFCO finance heliostorage?

Nefco - the Nordic Green Bank finances Heliostorage to support the scale-up of its emission-free heating and energy storage solution internationally. "We foresee a significant rise in thermal energy storage adoption over the next five years as Europe works towards achieving its Net Zero goal by 2030.

Who financed heliostorage?

Nefco, the Nordic Green Bank has financed Heliostorage to support the scale-up its solution internationally.
