The EU limit for plug-in solar is 800W, usually done with 2 panels and usually around 500EUR. I'm not sure if Luxembourg is already following EU rules and if creos/enovos actually has implemented a process to deal with those systems. The power station/camping things are definitely not going to make money.

The grand duchy has bucked the global trend by raising its solar subsidies. The Luxembourg government has raised feed-in tariffs for PV power generators. For installations with a generation capacity of less than 10 kW, the feed-in tariff will rise 36% to EUR0.165/kWh and all installations below 500 kW are set to benefit from an improved regulatory framework.
