

Are the Maldives achieving a net-zero energy system?

The Maldives are an example of island countries having one of the most ambitious emissions targets of all island nations ,as they aim to reach a net-zero energy system already by 2030.

Are offshore floating Technologies a viable energy source in Maldivia?

Table 1. Review of studies of the Maldivian energy system and renewable resource potentials. Offshore floating technologies have an enormous potential for electricity generation,and several studies dealt with feasibility analyses and case studies.

How will aspire and rise help the Maldives' energy transition?

World Bank-financed projects ASPIRE and ARISE support the Maldives' energy transition by installing more than 53.5 megawatts of solar capacity and 50-megawatt hours of battery storage. This will reduce Maldives' annual import bill by about \$30 million,with a project lifetime saving of \$756 million over 25 years.

What is the energy supply structure of the Maldives?

Liquified petroleum gas (LPG) was consumed for cooking,as well as a small amount of biomass. The energy supply structure of the Maldives is representative for small islands or small island development states (SIDS) in the Sun Belt,.

What can we learn from the Maldivian energy project?

The project in the Maldives explores the potential of other renewable energy sources like wind and hydrogen,as well as new technologies such as EV charging stations and vehicle-to-grid technologies. We can learn from these efforts to expand the use of renewable energy and innovative technologies in the Maldivian energy sector.

What are the constraints for the energy system design in Maldives?

In both years,the constraints for the system design are the same,which is that all of the electricity and fuel demand has to be satisfied for every hour of the year. No connection for electricity import or export from or to outside of the Maldives shall be available.

Engineering consultancy firm specialising in marine renewables Innosea will team up with Suntrace, a Hamburg-based independent renewable energy advisor, as well as Renewable Energy Maldives (REM) and two environmental and social consultants to work on this forward-looking project.
