

Marshall Islands qn solar 410

The 410-Solar is a battery operated portable reflectometer, the ideal tool for field solar reflectance, solar absorbance measurements and mirror assessment. Quickly and accurately collects solar reflectivity data necessary to calculate solar reflectance index (SRI) values for cool roofing and green building LEED certification.

The Marshall Islands consists of 29 atolls and 5 islands, the majority of which are not electrified, have an unreliable energy source, and pay very high fuel costs. In addition, income levels are low and communities are extremely remote, with small populations, long distances between each atoll, and unreliable transportation.

for "an improved quality of life for the people of the Marshall Islands through clean, reliable, affordable, accessible, environmentally appropriate and sustainable energy services." This energy mandate is consistent with "Vision 2018", the Marshall Islands Strategic Economic Development Plan for 2003-2018.
