

Mass energy storage Turks and Caicos Islands

How much does electricity cost in Turks and Caicos?

The 2015 electricity rates in Turks and Caicos are \$0.29 per kilowatt-hour (kWh), slightly below the Caribbean regional average of \$0.33/kWh. Like many island nations, Turks and Caicos is almost 100% reliant on imported fossil fuel, leaving it vulnerable to global oil price fluctuations that have a direct impact on the cost of electricity.

Does Turks and Caicos have a policy on energy efficiency?

Turks and Caicos has few policies related to energy efficiency and renewable energy. Historically, the territory has not implemented policy mechanisms to aid in the development of clean and energy-efficient technologies.

Could ocean thermal energy help Turks and Caicos meet its peak demand?

Once wave and ocean thermal technologies are proven in the marketplace, ocean energy and ocean thermal energy conversion have potential as well. Abundant wind and solar resources, as well as the potential for other renewable sources could help Turks and Caicos meet or exceed its peak demand of 34.7 MW.

Who regulates the electricity sector in Turks and Caicos?

Four main entities are responsible for governing the electricity sector in Turks and Caicos. The governor grants and revokes licenses, regulates the level and structure of tariffs that electric companies can charge for various customer groups, and approves changes to these regulations.

Providenciales, Turks and Caicos Islands (Thursday, June 8, 2023) - FortisTCI will invest \$8 million to install the country's first solar plus battery microgrids to power 30% of the electricity supply on North and Middle Caicos and 91% of the electricity supply on Salt Cay in 2024. The microgrids represent the Company's single largest green energy investment to date.
