

Metris energy Cambodia

Will Cambodia get more solar power by 2023?

Even though renewables now make up most of Cambodia's energy, bigger ambitions are ahead. An additional 495 megawatts (MW) of electricity generation from seven solar power plants will be online by 2023. This will boost solar power's share to 20% of installed power capacity.

Is solar energy a good investment in Cambodia?

Already, there is growing awareness about solar energy in Cambodia, providing an excellent investment opportunity--while also the cheapest way for Cambodia's EDC to buy electricity. Solar power purchase agreements in the region reached a low of USD 0.0387/kWh.

Does Cambodia have a good energy data set?

The Cambodia Energy Statistics 2019-2020 provides nationally available energy data before 2010 on coal, electricity, and biomass. The longer historical energy data set provides Cambodia with a good dataset for any energy planning analysis as it is used to predict the future behaviour of energy consumption.

How has energy consumption changed in Cambodia?

Cambodia's total primary energy supply (TPES) increased by an annual average rate of 5.8% from 2000-2010 and by 8.0% from 2010-2019, showing the same trend as total final energy consumption (TFEC). Due to a significant rise in electricity demand, Cambodia rapidly increased hydropower and coal power generation from 2010 to 2019.
