Renewable Energy. In the Gambia, Renewable energy represents a tremendous opportunity, according to the &#226;EURoePotential Assessment Study of Renewable Energy Resources in the Gambia, 2006, the following renewable energy has been found to be available: Solar, wind and biomass. Hydro potentials are non-existing in the Gambian territory.

The Gambia is a small, fragile country in West Africa. Stretching 450 km along the Gambia River, the country (all 10,689 square kilometers of it) is surrounded by Senegal, except for a 60-km Atlantic Ocean front.

Thus, The Gambia is becoming increasingly well positioned to help diversify its energy mix by incorporating new sources of renewable energy. H.E. the Vice President Dr. Isatou Touray presided (<https://bit.ly/3Ely2qN>) over the inauguration of a EUR2.7 million project named Renewable Energy Potentials in The Gambia on September 6, 2021.
