Executive President Shereen Chen explains that each sphere is designed with multiple layers of cutting-edge materials, providing performance metrics that far surpass those of traditional solar panels. These spheres, reminiscent of miniature Death Stars, are significantly smaller than solar panels but offer 7.5 times the output.

The mission is part of a project called OHISAMA (Japanese for Sun), which is on track for launch in 2025. An adviser at the Japanese research institute Japan Space Systems, Koichi Ijichi, shared details about the country's plans to make a mini space-based solar power plant. The plant will wirelessly transmit energy from low Earth orbit.
