

Monetizing energy storage Morocco

How does electricity storage work in Morocco?

It ensures the storage of electricity produced by renewable energies in order to adapt fluctuating supply to shifting demand. The first large-scale electricity storage project in Morocco is the 460 MW Afourer Pumped Storage Power Station (PETS), commissioned in 2004.

How to save energy and control energy consumption in Morocco?

In this context, a number of measures to save energy and control energy consumption in various sectors (industry, buildings, agriculture, public lighting and transport) have been adopted in Morocco. To support energy efficiency programmes, Law 47-09 on energy efficiency was published in 2011 .

How is Morocco pursuing a resilient energy future?

Morocco is pursuing a resilient energy future through a multifaceted approach. This includes a strategic focus on renewable energy sources to accompany its energy transition, and the diversification of its energy mix to ensure a sustainable energy transition without compromising energy security.

How can Morocco improve its energy security?

As a net energy importer seeking to improve its energy security, Morocco has stepped up initiatives to achieve a level of domestic energy sovereignty. This includes following guidelines for transitioning to cleaner energy sources, with an emphasis on diversification.

What is the first large-scale electricity storage project in Morocco?

The first large-scale electricity storage project in Morocco is the 460 MW Afourer Pumped Storage Power Station(PETS), commissioned in 2004. It consists of a hydraulic system composed of two 1.3 million-m³ water reservoirs connected by a pipeline with two hydroelectric production units between the basins.

How can Morocco transform its energy sector?

Morocco has embarked on an ambitious journey to transform its energy sector. This ambition is driven by the High Royal Orientations and has three key pillars: increasing renewable energy capacity, promoting energy efficiency, and fostering regional integration.
