

Montserrat solar panel miri

Why do we need solar panels in Montserrat?

The use of Solar Panels meets one of the Governments priority needs which is to improve energy security by slowly transitioning to renewable energy. The incorporation of Solar into the Grid on Montserrat, resulted in a 13% renewable energy input on the grid, which is 3% above the European Union's key performance indicator (KPI) of 10% .

Who installed the solar PV system in Montserrat?

The solar PV system was successfully installed and commissioned by the Salt Energy Company and handed over to the Government of Montserrat in March of 2019. The units were installed on three buildings; MCW workshop, the Brades power Station and the Factory Shell Buildings commonly referred to as the Montobacco building.

What is Mirai solar?

Mirai Solar is disrupting the global greenhouse market by replacing existing shade cloths with foldable, retractable, transparent solar modules. Our customizable, lightweight technology can also be applied to a variety of building integrated solar projects. Mirai Solar is re-inventing shade into the energy of the future.

What is Montserrat's energy policy?

The first Energy Policy was approved in 2008 by the Government of Montserrat. The policy was then revised and updated in 2016 to include Government incentives and to update the policy with appropriate targets. The new Energy Policy (The Power to Change) that is currently being implemented runs from 2016 to 2030. Progress made so far includes: -

Does Mirai solar need shade?

At Mirai Solar, we believe that any need for shade should be taken as an opportunity to harness the energy of Sunlight. The Mirai Screen is a photovoltaic solar screen with variable shading and output power. A fraction of the light is absorbed in the module, generating electricity, while the remaining light is transmitted.

Why should Montserrat buy a new electric vehicle?

The purchase of the vehicle supports the Government's aim to promote the development of electric, hybrid electric and advanced vehicle technologies for Montserrat. A pilot project was commissioned to review the performance of the technology under local conditions and get feedback of driver's acceptability.
