What is MPI Hybrid solar inverter?

The MPI Hybrid Series solar inverter offers great versatility in both GRID-TIED and OFF-GRID applications. Available in 5KW, 5.5KW (single phase) and 10KW (three phase) output, the MPI hybrid series has extended support of PV input up to 14.85kw maximum (MPI 10k).

Does MPI 5K have dual AC input?

Available only on MPI 5K, dual AC input for Grid + Generator is now possible. Genset starter dry contact is also a standard feature on these models, and in the absence of grid, users may use the dry contact to send activation signal to generator for battery charging and load backup.

Do I need a parallel kit for MPI 5K & 10K?

Only on MPI 5K, and 10K, this feature allows users to set up parallel units of up to 6 units, greatly increasing the maximum power output to accommodate wider range of application. All accessories are included and there is no need for any parallel kit.

Can a GK power supply be combined with a solar power source?

Available on GK models: output to load can now be combined from SOLAR + UTILITY source simultaneously if solar power is insufficient. This feature applies to both when battery is connected or also when unit is running in batteryless mode.
