

# Myanmar pay as you go solar system

Does Myanmar utilize solar energy?

Myanmar has high solar irradiation levels in many areas, but no large-scale solar systems have been installed due to the largely mountainous terrain, protected areas, and limited grid system, which weaken the energy potential from this source.

Can a solar power business help under-served communities in Myanmar?

An exciting off-grid power business bringing affordable clean solar-energy to under-served communities in Myanmar has switched into fund-raising mode.

Why is SolarHome so popular in Myanmar?

"One of the crucial motives behind SolarHome is the Myanmar market landscape. In emerging markets power networks are built out slowly, which means these economies can lag in development in relative terms, which disadvantages the hard to access rural regions.
