

Who is Namibia Energy Corporation?

Namibia Energy Corporation (NEC) is a dynamic global oil and gas industry player founded by the renowned Brazilian geologist Dr. Marcio Rocha Mello, PhD. Committed to innovation and excellence, NEC is dedicated to responsibly explore Namibia's oil resources, focusing on skill and technology transfer to enhance local capabilities.

What is happening in Namibia's energy sector?

Namibia's energy sector has seen rapid development in a short period of time owing to five recent major oil and gas discoveries, which include the Venus-1X, Graff-1X, Jonker-1X, La Rona-1X, and Lesedi-1X exploration projects.

How much electricity does Namibia export?

of 55.2 percent registered a month earlier. However, the index registered a decline of 11.7 percent yearly. During the period under review, Namibia exported a total of 11 777 MWh of electricity of which 81.2 percent was supplied to STEM Sales-SAPP, followed by Botswana (9.3%), while 5.6 per

What is the invest in Namibia energies Country Spotlight?

The Invest in Namibia Energies country spotlight represents just one of many spotlights set to take place during this year's edition of AEW. #AEW2023 takes place this week in Cape Town under a mandate to make energy poverty history by 2030.

Is biomass a source of electricity in Namibia?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Namibia: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Will Namibia become a supplier of energy?

Once Namibia has successfully incubated the green hydrogen economy, it will enable the country to become a supplier of energy, rather than an importer.

Cleanergy Solutions Namibia is driving the growth of Namibia's hydrogen economy while contributing to the global shift towards clean energy. Leveraging the O& L Group's expertise in renewable energy, combined with CMB.TECH's proficiency in producing and applying future fuels, Cleanergy Solutions Namibia is at the forefront of sustainable energy solutions.

This process mainly occurs in the communal lands north of Namibia where the main crops are millet, sorghum, corn and peanuts. Sorghum is traditionally the staple food in Namibia which derives from the Oshiwambo word mahangu, from the Owambo tribe. Sorghum produces grain, which Namibians use in many of their day-to-day meals.
