

New Zealand solar smart

How can solar power help New Zealand?

We're working with the sector on New Zealand's renewable energy and low-emissions transition. We're responsible for the governance and regulation of New Zealand's electricity industry. Solar power can help you become more self-sufficient, reduce your carbon footprint and reduce your energy costs.

What is solar energy in New Zealand?

Learn about solar energy in New Zealand, and its advantages and limitations. In October 2022, Electricity Authority data showed 43,641 solar systems installed across New Zealand, adding up to 240 MW. This makes up an estimated contribution of under 1% of total electricity consumption.

Is going solar a good idea in New Zealand?

Going solar helps the environment - it creates clean, green energy and is a great way to reduce your carbon footprint. Going solar demonstrates your commitment to sustainability and will help New Zealand achieve its target of net zero greenhouse gas emissions by 2050. Is your property suitable for solar?

Is solar power a smart investment?

With the rising costs of petrol and electricity, electric vehicles charged by solar power are a very smart investment. When your home is set up to take advantage of solar energy, you can harness this power to charge your EV and prioritise a faster charge if required.

Could solar power be the future of New Zealand's electricity grid?

This decrease in cost - which is expected to keep falling - means that solar may potentially play a stronger role in our electricity grid as electrification intensifies. Forecasts suggest Solar PV could make up 6% of New Zealand electricity supply by 2035. Explore solar installation data | Electricity Authority

Why should you choose SolarPulse NZ?

New Zealand's breathtaking landscapes and progressive attitude towards sustainability make it a prime candidate for harnessing the sun's power. With abundant sunlight and a commitment to a greener future, homeowners in New Zealand have a unique opportunity to embrace solar energy with SolarPulse NZ.

Covering 64 hectares in Kaitiaki, the solar farm includes 61,000 Trina Solar Vertex 550W bifacial dual glass panels on TrinaTracker Vanguard 2P smart tracking systems, with 33MW DC capacity. This farm marks a major stride toward New Zealand's renewable energy targets, expected to generate around 55GWh annually, powering over 7,770 households.
