

Who financed a solar power plant in Niger?

The European Union, the French Development Bank and the government of Nigerco-financed the installation. A French consortium made up of Akuo and Sagecom has finished building a 30 MW solar power plant in Gorou Banda, Niger. The Niger government had initially planned the project to have a capacity of 50 MW.

How can Niger balance its energy mix?

This transformative project, funded by the World Bank through the International Development Association (IDA), will enable Niger to better balance its energy mix, which is currently largely dominated by thermal energy. This initiative is particularly crucial for a country that frequently faces climatic shocks.

Does Abdoul-Kader have a solar power plant?

If Abdoul-Kader's business is flourishing today, it's thanks to the new Ingall solar power plant. With a 750 kilowatts capacity, the plant now provides a 24-hour electricity service to the entire commune, when power only used to be available from 10 am to midnight. "Previously we all slept in the dark."

A few years later, in 1883, Charles Fritts actually produced the first solar cells made from selenium wafers - the reason some historians credit Fritts with the actual invention of solar cells. However, solar cells as we know them today are made with silicon, not selenium. Therefore, some consider the true invention of solar panels to be tied ...
