Could a 500MW solar project be built in South Norfolk?

Island Green Power is seeking public opinions on provisional plans for a nationally significant solar and storage project in South Norfolk. The renewable energy developer has launched public consultation on early-stage proposals for a 500MW solar development co-located with a battery energy storage system (BESS) that could have up to 500MW output.

Who is Island Green Power?

Island Green Power is a leading developer of renewable energy projects, with a focus on utility-scale solar farms and battery storage systems. Our mission is to help the UK increase our solar energy generation, making more renewable energy possible and drastically reducing carbon emissions. The way we consume energy is already changing.

Where is the Drove Solar Farm - Island Green Power located?

The Drove Solar Farm - Island Green Power is in the early stages of developing a new solar project located on land north of Swaffham and south of Castle Acre, West Norfolk. Island Green Power is in the early stages of developing a new solar project located on land north of Swaffham and south of Castle Acre, West Norfolk.

Does Island Green Power need planning permission for Drove Solar Farm?

The planning permission to build and operate the project requires Island Green Power to submit a Development Consent Order (DCO) application. Once submitted, the Drove Solar Farm DCO application would be examined by the Planning Inspectorate, the independent body responsible for examining NSIPs.

Will Island Green get a DCO for Cottam solar project?

The non-statutory consultation comes after Island Green revealed plans for the development early in September, just one week after energy secretary Ed Miliband granted the developer a DCO for the 600MW Cottam Solar Project.

How long does it take for Island Green Power to develop?

Island Green Power expects the planning and approval process to take between two and three years, and plans to submit the DCO application to DESNZ in late 2025. Environmental surveys to determine the best location for the development across the available land have already begun and will be presented as part of the upcoming community consultations.

Island Green Power is a leading developer of renewable energy projects, with a focus on utility-scale solar farms and battery storage systems. Our mission is to help the UK increase our ...

Foresight Group has formed a joint venture (JV) with UK solar developer Island Green Power to develop a pipeline of nearly 700MW of greenfield solar projects. The pair are aiming to develop five subsidy-free solar
