Did North Macedonia change its energy regulations?

There were no major energy legislative changes, but North Macedonia continued to harmonize its energy regulations with the EU Energy Community's Third Energy Package (TEP). North Macedonia's state-owned power company was unbundled and partially privatized in the early 2000s.

What is the Integrated National Energy & Climate Plan of North Macedonia?

The Integrated National Energy and Climate Plan of North Macedonia elaborates on all five dimensions of the Energy Union: i.e. decarbonisation (addressing two segments: greenhouse gas emissions and renewable energy sources), energy efficiency, security of energy supply, internal energy market, and research, innovation and competitiveness.

Who is the Energy Regulatory Commission of Macedonia?

The Energy Regulatory Commission of Macedonia also participates, as an observer, in the work of the Council of European Energy Regulators (CEER).

What is the energy mix in Macedonia?

The energy mix from domestic resources in Macedonia is dominantly based on lignite, biomass and, depending from the hydrology, electricity production from hydro power plants.

Who is responsible for natural gas in Macedonia?

JEC GAMAI is responsible only for the natural gas pipelines Kriva Palanka, Kratovo and Kumanovo to Skopje, as well as the ring around Skopje, while the state company National Energy Resources is responsible for the construction of the new transmission lines in Macedonia.

EIB set to finance offshore wind projects as Greece moves toward 1.9 GW energy target; Bulgaria to restart Maritsa East 3 units and increase state control in 2025; Unlocking Bulgaria's offshore wind potential: A key to economic growth and budget recovery; Bosnia and Herzegovina: Energy production declines in September 2024, while imports rise

The autumn of 2021 has been a tumultuous period for North Macedonia for several reasons. The main topic has been the ongoing energy crisis that the Macedonian Government announced on the 9th of November, with an initial period of 30 days. Before that, the local elections in October brought drastic changes in local

governance in more than half of the ...

Since the adoption of the new Energy Law in 2018, a day-ahead energy market has been expected to be implemented in North Macedonia. On 10 May 2023, the Macedonian National Electricity Market Operator ("MEMO") rolled-out and started operating the day-ahead electricity market exchange. This market is envisaged as one of the key elements of a future Western ...

The meeting focused on the state of energy sector reforms in North Macedonia and advancing the decarbonization agenda in the face of the current situation on the energy markets. He invited all stakeholders to actively engage in an inclusive process of setting 2030 targets for energy efficiency, renewables and greenhouse gas reduction in 2022.

North Macedonia has announced that it will close all of its coal-fired thermal power plants by 2028. North Macedonia is the first country in the Western Balkans to decide to stop using coal for electricity generation. ... In order to compensate for the lack of electricity generation capacities in the country, around 2,200 MW renewable energy ...

Five potential investors have submitted bids in a tender by natural gas transmission company Nomagas for the construction of the Macedonian part of a natural gas interconnector with Greece, an assignment valued at 83.7 million euros, VAT excluded, according to local media reports.. The tender attracted four bids from foreign companies and one from a ...

With the Kavadarci project, the company continues its international expansion following the successful launch of its first large-scale solar power plant in North Macedonia in October 2022, located in Amzabegovo, which has a total capacity of 17 MW and produces up to 25,000 MWh of electricity per year.

In a bold move to bolster its energy sector, North Macedonia's state-owned power utility, Elektrani na Severna Makedonija (ESM), has unveiled a new leadership team tasked with steering the company through a critical period of transformation. At the helm is Lazo Uzun?ev, a seasoned mechanical engineer with a wealth of experience in private sector ...

June 25th, 2024 | Skopje, Macedonia Alcazar Energy Partners announces \$500m investment to launch the largest onshore Wind Farm Project in North Macedonia. Skopje, 25.06.2024 - Alcazar Energy Partners, a leading investor in renewable energy within growth markets, announces the launch of the largest wind farm project in North Macedonia with a capacity of up to 400 MW.

In September 2024, total electricity consumption in North Macedonia amounted to 389,954 MWh. Natural gas consumption was recorded at 30.68 million cubic meters, coal consumption reached 234,251 tons, and petroleum products consumption stood at 110,437 tons.

Our country adopted a new Energy Law in June 2018, harmonizing its energy legislation with the EU Energy

Community's Third Energy Package. North Macedonia is a full member of the Union for the Coordination of Production and Transmission of Electricity European Interconnection (UCPTE), which ensures interconnection compatibility with European ...

North Macedonia today launched a just energy transition investment platform to guide its far-reaching plans for a low-carbon and just transition of the electricity sector. The platform represents a milestone for the ...
