Is North Macedonia ready for renewables?

There are several renewables projects underway in North Macedonia, making the country an unexpected frontrunner in the region as it embarks on its energy transition. The Energy Community said recently that North Macedonia remains the only country in the Western Balkans that has expressed its intent to gradually phase-out coal.

What is the solar power potential of North Macedonia?

Solar power potential The solar potential of North Macedonia is clearly the most prominent clean energy resource in the country.

Is North Macedonia reliant on fossil fuels?

According to the national and international statistics, such as those run by the World Data and the International Energy Agency, North Macedonia remains reliant on fossil fuels<sup>28</sup>. Majority of its total energy mix, both on supply and demand side, still falls under the category of fossil fuels (Figure 2), mostly due to the usage of coal and oil.

Is Macedonia ready for a future energy community?

Considering the latest developments in the energy governance of the country, the adoption of the 2040 Energy Development Strategy, and the initial steps and enthusiasm present in the Macedonian Government for supporting citizen energy and prosumers, are providing good prospects for the establishment of future energy communities.

What is North Macedonia's energy mix?

In addition, North Macedonia's energy mix includes a significant percentage of hydropower, having mountainous geography with powerful streams of rivers running through the country. For the time being, the hydropower capacity is partially used.

the energy sector 53% North Macedonia has considerably expanded its renewable energy capacities through a self-consumption scheme and has progressed on energy efficiency with a focus on finalising the amendments of the Energy Efficiency Law. North Macedonia should adopt the Renewable Energy Law and the amending the Energy Efficiency Law.

issue of the green transition. "The energy transition to green energy is important, but a poor country like Macedonia should not rush to implement it, as it could cause an energy crisis", Mickoski concluded at the Energy Forum.<sup>6</sup> Mickoski added that he is convinced that in a few months from today, Macedonia will be energy independent.

To get there, the government ambitiously seeks to boost its RES power generation capacities to 50 percent by 2024. But the government's announcement to overhaul the Bitola power plant at a press conference on 10 February potentially undermines its ambitious plans to drive forward the energy transition under the green scenario, according to ...
