

Oman verdo energy system

What is Verdo Energy's decentralized waste to energy concept?

Verdo Energy's decentralized Waste to Energy concept is focused on handling the waste where it is generated and converting the energy form waste into thermal or electrical energy used for private industries or local municipalities with a need of energy. We have four standard sizes for the waste to energy boiler plant, 4MWt, 6.7MWt, 10MWt and 15MWt.

Does the Verdo waste to energy plant comply with the EC?

The Verdo Waste to Energy plant complies with EC norms related to the waste incineration directive. Waste handling and generation of thermal and/or electrical energy in one location

What size boiler does Verdo energy offer?

We have four standard sizes for the waste to energy boiler plant, 4MWt, 6.7MWt, 10MWt and 15MWt. Verdo Energy has many years of experience within biomass conversion, and the company converted its own CHP plant in 2009. At the same time, we supply hot-water boilers in the 1-20MW capacity range for production of heat and steam.

Is Verdo production a/s part of Energi & Forsyning?

o Verdo Produktion A/S first became part of the Energi & Forsyning division in March 2021, but has been included in the Energi & Forsyning figures for both 2020 and 2021 for the sake of comparability. o There were very good earnings on electricity production at the CHP plant in Randers in 2021.

Does Verdo use green energy?

All of the Verdo Group's own power consumption comes from green energy sources. The same is true for all our electricity customers. Verdo has 12 locations in Denmark and abroad, including Norway, the USA and Poland. Verdo is one of Denmark's largest street lighting operators.

Does Verdo have a green power certificate?

Note 1: Verdo has purchased a green power certificate equal to our total electricity consumption. We have applied an electricity emission factor of 0 g CO₂e per kWh of electricity. Our own consumption of district heating comes from our CHP plant in Randers and the CHP plant in Herning.
