The promotion runs from June 5th to July 17th, 2024.

Solar inverters typically last between 10 and 15 years. This shorter lifespan is due to the continuous work inverters do to convert the energy from the panels into usable electricity for your home. Replacing solar inverters typically costs between \$1,000 and \$2,000. Which solar panels last the longest?

The company's flagship NV14 energy storage system uses lithium-iron phosphate battery chemistry, the nonflammable and nontoxic alternative to lithium-ion. With its superior safety, performance, and compatibility with any solar system, new or existing, the NV14 has been named one of Solar Power World's top storage products four years in a row.
