

Milence selected Pixii to develop a robust and scalable BESS for the Venlo charging hub. A Pixii PowerBase system was installed with a 520 kW / 1.1 MWh battery energy storage capacity, ...

As a Norwegian company, Pixii takes pride in adhering to the highest standards of quality and security. Our robust approach to product development, manufacturing, and maintenance integrates multi-layered security protocols, well-documented product specifications, component-level traceability, online yield monitoring during production, stringent testing ...

The PowerBase is a robust energy storage system built on a steel frame with the footprint of a standard ISO 20-foot container. Pre-wired and pre-configured, it minimizes installation costs and delivery time, accommodating up to 12 Pixii PowerShaper cabinets with a ...

The new Brisbane office is an addition to Pixii's existing presence in Sydney and reflects our commitment to extending the reach across Australia. The strategic decision to expand in Brisbane was motivated by Pixii's increasing growth in the country and the unique suitability of its distributed BESS solutions for the Australian energy ...

The Pixii PowerShaper Indoor is a modular battery energy storage system that scales to your needs. It comes with smart functionality like time shift and peak shaving to reduce your energy cost, and it's fully integrated, enabling you to get the most out of your new or existing solar panels. Now you can take part in the flexibility market and ...

With the help of Pixii and Elywhere, Circle K are leading the way in revolutionizing the electric vehicle charging infrastructure and making charging an effortless experience anywhere. At ...

What's more, the Pixii battery energy storage system even enables Tensio to participate in the energy flexibility market, allowing them to monetize the system's flexibility for additional revenue streams for a faster return on investment. Pixii's battery energy storage system is a game-changer to the energy market.

Pixii introduces the PowerShaper XD and Energy Architect EMS - innovative systems designed to tackle the unique challenges faced by energy integrators, installers, and solar companies in Australia. Diesel generators have long been a staple for backup power in the outback, but they come with drawbacks - noise, emissions, and ongoing fuel costs.

Through this collaboration, Pixii's advanced battery storage system for households - Pixii Home - will be integrated with Greenely's services, enhancing the capacity of Greenely's Virtual Power Plant and offering customers a more energy-conscious solution.

Pixii powershaper Paraguay

Darren Nankivell, Pixii Global Product Manager - Off-grid Solutions, Greater Brisbane Area Network congestion Australia's electricity grid is stretched in certain regions due to the high concentration of rooftop solar and large-scale renewable projects.

The Pixii battery energy storage system is modular, easy to scale and quick to deploy. It comes with smart functionality, allowing you to reduce your energy costs, open new revenue streams, and get the most out of your PV installation ... Pixii PowerShaper XL family. Addressing more energy hungry applications with the PowerShaper XL family.

Tier 2 - Commissioning of up to 5 Cabinet Systems is an online self study course mainly targeted towards distributors of Pixii systems who are looking to carry out commissioning of an installation independently (with a maximum of 5 cabinets). This course will give you the necessary guidance to be able to navigate the web interface and carry out a setup of PowerShaper2 systems.

Pixii assesses if a component is faulty and requires replacement, after which the customer submits an RMA form on pixii . Depending on spare part availability, Pixii will promptly dispatch a replacement component in similar condition. Once received, the customer can replace the part and return the faulty one in its original packaging.

The solution is based on the PowerShaper product family - a proven technology platform of Pixii. It will be followed shortly by a second installation in Münster. In total, PASM plans to install battery energy storage systems with a total capacity of more than 300 MWh.

The Pixii Gateway is a built-in powerful controller, enabling you to connect with, monitor, and control all components within the system, as well as external sensors and other hardware at your site. ... PowerShaper Indoor. Monitoring and control. Related markets. Commercial and industrial. Reduce energy cost and unlock new revenue streams to ...

The Pixii solution is fully integrated and comes with our user-friendly Pixii gateway web app, allowing for easy installation with minimal on-site work. Our team of engineers have combined their extensive expertise and knowledge of the ...

ENGIE's first battery storage system in Slovakia, utilizing Pixii's PowerShaper technology, began operations in January 2024. This BESS is integral to ENGIE's multi-phase project, enhancing grid stability, supporting renewable energy integration, and laying the groundwork for future energy flexibility services in Slovakia.

The implementation of Pixii's PowerShaper technology has revolutionized Greenbat's ability to provide ancillary services. The system's rapid response time, capable of adjusting power within three seconds, is ideally suited for primary frequency regulation, helping to stabilize the grid and ensure a reliable electricity supply.
