

Which battery storage projects have won energy auctions in Poland?

Battery storage projects from Hynfra Energy Storage and OX2 totalling 130MWh have won contracts in energy auctions in Poland this week. A capacity market auction for 2027 from transmission system operator Polskie Sieci Elektroenergetyczne (PSE) closed at PLN 406.35/kW/year (US\$93) and handed out long-term contracts to energy resources.

Will Poland lead Eastern Europe's battery storage market?

Poland is set to lead Eastern Europe's battery storage market, with 9GW offered grid connections and 16GW in the capacity auctions.

Can Poland create a broad energy storage industry?

The new rules create an opportunity for Poland to create a broad energy storage industry, PSME's president said, from the development of technologies and products to the creation of jobs. In the main power market auction in 2022, battery energy storage was contracted for the first time - 165 MW to be exact.

Which companies are building a battery storage facility in Poland?

Polish utility PGE Group has launched a tender for the design and construction of a battery storage facility with a minimum capacity of at least 900 MWh. Meanwhile, Ukraine's DTEK has completed the acquisition of a 532 MWh battery storage project in southern Poland. Image: Sandia National Laboratories, Wikimedia Commons From ESS News

How do energy storage projects work in Poland?

The operational stage of a storage project also typically involves a process of support agreements such as O&M contracts, technical consulting, and power distributor agreements. Projects concerning energy storage, as with other infrastructure projects in Poland, require the necessary administrative permits to be obtained.

How to start an energy storage facility in Poland?

When considering starting an investment as an energy storage facility, it is necessary to apply the Energy Law, which contains regulations for this type of installation. The main regulatory obligations in Poland depend on the total installed capacity of a given storage facility.

Jan Kloczko, the firm's deputy commercial director for Europe, discussed the wins, the status of the projects, its activity in Hungary and more in this Q& A interview whilst at Solar Media's Energy Storage Summit Central and Eastern Europe (CEE) 2024 in Warsaw, Poland last week.. Energy-Storage.news: talk us through the process of bidding into last year's ...

The draft parameters for this year's capacity market auction in Poland could make the rollout of battery energy storage systems (BESS) much more difficult. The document proposes a significant ...

Poland, Europe's tenth-largest economy, is set to become a hotbed of energy storage project development as the share of renewable energy on its grid soars. The country built out a record 1.2 GW of onshore wind power in 2023, according to ...

As electricity storage is a relatively undeveloped field in Poland, there are still no detailed acts in Polish law which refer to it. However, the Renewable Energy Sources Act ("RES Act") defines an electricity storage facility as a dedicated facility or group of facilities where electric energy generated as a result of technological or chemical processes is stored in a different form.

The de-rating factor for energy storage bidding into the next capacity market auction in Poland has been slashed from 95% in the last two previous auctions to 61%, Jan K?oczko, deputy commercial director of independent power producer (IPP) Greenvolt Power said on ...
