

Portugal genius energy solutions

What is Portugal doing to reduce energy consumption?

Portugal is taking firm steps to reduce energy consumption, use its resources more efficiently, provide more sustainable mobility, achieve greater security of supply, and diversify its renewable energy footprint. Energy Solutions is one of the areas where Portugal stood out at HANNOVER MESSE'22.

How does Genius Energy provide energy?

Genius Energy provides clean, renewable energy by installing high-quality solar panels on your property. Our team of experienced technicians ensures that all equipment used is warranted, insurable, and of the best in class, designed to work and last in challenging climates like Texas.

What is Portugal's energy transformation?

Portugal's transformation is more than just about energy production; it's a narrative of resilience, innovation, and community spirit. As the country forges ahead, its commitment to renewable energy serves as a powerful reminder that a brighter, greener future is possible, and it begins with each of us.

Does Portugal have a high rate of green energy consumption?

Portugal boasts one of the highest rates of green energy consumption in Europe. From 30 May to 2 June at HANNOVER MESSE '22, companies from Partner Country Portugal showcased their technological solutions for clean-energy production and demonstrate to the global market Portugal's vast know-how and experience in the renewable electricity sector.

How much solar energy does Portugal produce?

In a bold announcement, Portugal recently surpassed its entire solar output from 2023 by September 2024, celebrating a record year for solar energy production. According to REN (Rede de Energia Nacional), the country generated more than 3.99 TWh of solar energy in just the first nine months, exceeding last year's total of 3.6 TWh.

How many GWh of electricity is produced in Portugal?

Between January 1st and May 31st of 2023, 18,751 GWh of electricity were generated from Continental Portugal, from which 73.2% came from natural resources (sources (30.5% wind, 28.30% hydro, 7.6% bioenergy and 6.8% solar). Other sources include: Natural Gas (15.9%), Fossil CHP (4.7%), and Pumped Storage (6.2%).
