Comparatively, partial-home battery backup systems usually store around 10 to 15 kWh. Given that power outages are infrequent in most parts of the country, a partial-home battery backup system is generally all you'll need. But, if your utility isn't always reliable for power, whole-home battery backup may be the way to go.

A traditional type of backup power still used by many, a battery backup system can handle both AC and DC loads, depending on the design. Single battery systems work well for power outages lasting only a few hours, while larger battery bank systems or those that utilize a vehicle battery can provide steady power for one to two days.
