

Qatar cubic modular system

What is a cubic modular system?

The CUBIC Modular System provides numerous possibilities for construction of tested panels. With the CUBIC Modular System, the choice of electrical components is completely up to you.

Why should you choose cubic modular?

Whenever the need for a safe and efficient power distribution is needed, the CUBIC Modular system is the answer. The modular thinking behind our signature enclosure system makes it possible to build every type of switchboard solution in the low-power segment, based on several standard parts, without compromising on quality.

Why should you use cubic modular system with Rockwell Automation components?

When you use the CUBIC Modular System in conjunction with Rockwell Automation components you get everything you need to design and build optimized and IEC 61439-certified electrical switchboards and motor-control centers - quickly, more efficiently, and right first time.

How big is a cubic module?

The main module of the CUBIC modular system is 192 mm, which is remarkable for being divisible by 12 figures without decimals. During the construction of a panel, logical main and sub modules are used so that the fitter need not take millimetres into consideration. All fitting is done by means of only very few tools.

What can I download from cubic?

Downloads: Modular System Download brochures on the Modular System and the various CUBIC product solutions we offer within the Modular System, e.g. Multi Drawer, Plug-in, Cu-mini etc. If further information is wanted about solutions in relation to your project, please contact CUBIC.

Where can a modular system be used?

The modular system can be used in many situations, where electrical switchboards are a necessity to secure the operation of electrical equipment. The photo below shows a FORM 2 protection of the busbars vertically, in top and in front of the joints of the busbar systems.

Our modular mindset is the core of our business model and unique product concept, and makes us the best at what we do, by offering state of the art modular enclosure solutions based on flexibility, functionality, cost efficiency, training and support. Let's build the future together, through the power of modular thinking.

cubic ??? cubic ?????????????????????? ?????????? ?????????????????????? ?? cubic
????????????????????? cubic ??????????????????????

The modular design lends itself to a rapid manufacturing process which, in turn, can help us achieve the most

challenging of customer delivery schedules. We would typically offer this system type tested and utilizing devices from ...

When a safe and efficient power distribution is needed - the CUBIC Modular System is the answer. The Modular System from CUBIC is one of the most versatile and safe enclosure solutions in the market. The Modular System is an enclosure system for electrical switchboards making it possible to construct any type of low voltage switchboard.

About CUBIC. CUBIC was founded in 1973 based on a unique idea of a modular system for the construction of electrical panels. This idea has since the early start developed CUBIC into a global and recognized partner within electromechanics and with a product range that comprises any type of enclosure.

Main switchboards Highest safety, quality, efficiency and endurance. When these qualities are required for electrical power distribution, an electrical switchboard solution from CUBIC is the ideal choice. Read more Main switchboard built in the Modular System Any main switchboard designed in the Modular System, offers an infinite opportunity for effective power distribution up to 6300 ...

uniform quality level all over the world on panel systems enclosed with the CUBIC modular system. CUBIC has many years of experience in delivering enclosure solutions based on our modular system that is applicable in several industries. CUBIC has provided solutions for infrastructure and building services projects, OEMs, as well

Distribution switchboards When only the highest safety, quality, efficiency and endurance are required for electrical power distribution an electrical switchboard solution from CUBIC is the ideal choice. Read more Operational and ...

Distribution switchboards When only the highest safety, quality, efficiency and endurance are required for electrical power distribution an electrical switchboard solution from CUBIC is the ideal choice. Read more Operational and personnel safe distribution switchboards Low voltage distribution panels from CUBIC are constructed on our Modular System, which is the perfect ...

The NHP CUBIC Modular System is based on the concept of efficiently using standard parts to construct a tailored switchboard to achieve your individual project requirements. The system is independently tested for verification to ...

The CUBIC Modular System opens a world of opportunities to meet every. Read More June 29, 2023 Linkedin. Meet us at Future in Pharmaceuticals Ireland 2023! We cannot wait to welcome you at the CUBIC booth at Croke Park ...

CUBIC tilbyder avancerede modul#230;re kabinetl#248;sninger baseret p#229; fleksibilitet, funktionalitet, omkostningseffektivitet, uddannelse og support. ... uddannelse og support. Let's build the future

together, through the power of modular thinking. ? Introduktion til CUBIC's globale træningsprogram. Vidste du, at CUBIC-partnere, der designer ...

CUBIC Modular System. CUBIC's Modular System is based on a size of 192 mm. This modular size secures the maximum versatility and therefore allows all the individual requirements from end-user, customer or consultant to be built in the switchboard. Maximum versatility; Short delivery time of assembled switchboard; Easy to rearrange and make changes

Design systems that best fits your plant - CUBIC Modular System is brand agnostic; No need to over design. Best-fit engineering combined with multiple power input locations; Cut accreditation time - CUBIC Modular Systems are tested and verified ...

With Cubic Modular System EUROSIC can easily configure Power Distribution Boards up to 8750A, Motor Control Centers for motor control up to 630A per unit (Multi-Drawer), Marine panels, various Distribution boards, fixed or draw-out type, Control panels and special applications, depending on the request.

CUBIC Modular System addresses your most crucial demands: Build switchgear and panels that match your precise floorspace, project budget, and performance criteria. You get the flexibility ...

CUBIC-Modulsystem A/S | 6,800 followers on LinkedIn. The Power of Modular Thinking. | CUBIC was founded in 1973 based on a unique idea for a modular system for the construction of electrical panels. This idea has since the early start developed CUBIC into a global and recognized partner within electromechanics and with a product range that comprises any type ...

We create diverse, multipurpose modular solutions for different spaces including office, storage, housing, and accommodation related facilities based on prefabricated units. They are commonly used as modular prefab offices, ...

Discover how companies across the world use modular systems for a high degree of design flexibility. With the CUBIC Modular System, the choice of electrical components is completely up to you.

Download brochures on the Modular System and the various CUBIC product solutions we offer within the Modular System, e.g. Multi Drawer, Plug-in, Cu-mini etc. If further information is wanted about solutions in relation to your project, ...
