This project suggests a solar powered home lighting system that uses solar power and LED lighting technology in a more efficient way. Solar power systems use solar panels to convert the sun's energy directly to electricity. This electricity is stored in the batteries that can supply only DC output.

A 30W Solar Home Lighting System is ideal for the basic lighting needs of medium-sized homes. It can charge your mobile, run small table fans, power your solar lights etc, with better efficiency. In a 30 watt home solar lighting system or solar light for home, you will get a 40 Ah solar battery which provides you backup when required.

This Magneto Solar Home System is a cost-effective way to add light to your home, office or general space. This solar lighting system converts the sun's energy into renewable lighting and includes 3 LED extension bulbs with independent switches. Features.
