

Will Kosovo build a battery energy storage system?

The government of Kosovo will build a battery energy storage system(BESS) with a capacity of 200MWh-plus to deal with the energy crisis.

How will Kosovo's Energy System work?

The system will stabilize the fluctuating frequency of electricity, store energy in the early hours of the morning when consumption is low, and connect with solar, wind, or similar power plants. Kosovo* will own the facilities, the ministry added.

Who owns the energy facilities in Kosovo?

Kosovo* will own the facilities, the ministry added. Economy minister Artane Rizvanolli said the program would back the independence of the national energy system and enable its transformation. The details will be made known after negotiations between the government and MCC, planned for May.

How much solar power will Kosovo have in 2022?

It is looking to add at least 1.2 MW of utility-scale wind and solar projects, alongside 100 MW of rooftop PV capacity. According to the International Renewable Energy Agency (IRENA), Kosovo had 10 MW of installed PV capacity at the end of 2022.

How much does a grant to Kosovo cost?

The compact program for a grant to Kosovo*, estimated at USD 234 million, consists of two projects: batteries with an installed capacity of 200 MWh, and the development of the workforce and involvement of women in the energy sector, the Ministry of Economy said.
