According to the World Bank, Yemen has the lowest level of electricity connection in the Middle East, with only 40% of the population having access to electricity. Rural areas are particularly badly affected. Industrial concerns, hospitals and hotels have their own back-up generators. To address these shortages, a 340-MW gas-fired power plant is currently under construction-and close to completion-at Marib. Further expansion to the facility, which will add an additional 400 ...

Yemen has recently experienced a severe power shortage, unable to meet the power needs of its population and infrastructure. In 2009, the installed power capacity was about 1.6 GW, while, in fact, the power supply ...
