Who is Sanko Energy Group?

SANKO Holding brought its investments for the energy, which it started in 1997 to meet the energy needs of the subsidiaries of SANKO Holding, under a single roof and established SANKO Energy Group in 2006.

Why should you choose Sanko Energy Group?

With the total installed capacity approximately 1000 MW, SANKO Energy Group adopts the principle of supplying the electricity needed by our country with high quality, reliable, competitive and environmentally friendly.

What does Sanko energy do?

As an active member of Deniztemiz TURMEPA Association, which adapts protection of the coasts and seas of our country as a mission, SANKO Energy collects waste, sewage and bilge discharged from the boats and prevents millions of liters of liquid waste from mixing into the sea by the waste collection boat it sponsors in Goecek and Bodrum.

How does Sanko contribute to Turkey's growing energy demand?

While contributing to Turkey's growing energy demand in a reliable and sustainable way, we target to use the local resources in a most productive and efficient manner. Initially in 1977, Sanko Holding invested in power generation business to meet the electricity demand of the Group companies.

What type of energy is used in Algeria?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Algeria: How much of the country's energy comes from nuclear power?

Algeria: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key ...
