

Slovakia 400w grid tie inverter

What is the best grid tie inverter?

When it comes to power, there is simply no stronger grid tie inverter out there than the SMA Sunny Boy 5000W inverter. At 5000W, this mammoth can handle just about anything your solar panels can throw at it, and shouldn't face any problems even during peak sunlight hours around midday.

What is a pure sine wave grid tie inverter?

Pure sine wave grid tie inverters are located between your renewable array and home. The electricity produced by renewable technology is Direct Current (a straight line, going only one way), whereas the grid's electricity is Alternating Current (a wavy line going both directions).

How do grid tie inverters work?

This process is called Net Metering. Moreover, grid tie inverters are designed so that they need only match the grid's waveform and voltage, rather than having to match a wide variety of different appliances. (The overall process is made that bit simpler, in other words.)

Which solar inverter should I buy?

For any homes and businesses looking to profit off the installation of a grid tie inverter, an inverter like the Sunny Boy is probably your best bet (provided, of course, that you have the solar panel set-up to back it up). Best All-Rounder The Marsrock inverter is an impressive-looking piece of kit.
