

How will a solar plant benefit the Vatican?

The Pope has given full authority to two special Commissioners to supervise the plant's construction, ensuring that the project is carried out efficiently and effectively. The energy generated by this solar plant will cover all the Vatican's energy needs, eliminating dependence on non-renewable energy sources.

Does the Vatican need a solar plant?

The implementation of a solar plant not only improves the Vatican's environmental sustainability, but also offers economic and social benefits. By generating its own energy, the Vatican can save on light. This is especially relevant in a context where the price of light is a constant worry for many.

Why did Pope Francis build a solar plant in Rome?

Pope Francis' decision to construct a solar plant on the outskirts of Rome is a tangible manifestation of his commitment to sustainability and the fight against climate change. Not only will this initiative provide renewable energy to the Vatican, but it will also establish a standard for other institutions around the world.

Where is Vatican Radio's New solar power plant located?

The plant will be located in Santa Maria di Galeria, some 11 kilometers from Rome, where Vatican Radio's broadcasting station is located. Not only will this project generate renewable electricity, but it will also be integrated with the land's agricultural needs, combining modern technology with sustainable practices.

Where is Vatican Radio located?

Located on the edge of Rome, the 424-hectare site houses the transmission facilities for Vatican Radio, thanks to a 1951 agreement between the Holy See and the Italian State. The new plant is intended to supply the energy needs of Vatican Radio and contribute to "the complete energy sustenance of Vatican City State."

Vatican City is on track to become the 8th country in the world to generate 100% of its electricity from renewable energy, following Pope Francis' announcement about plans to build a large solar plant. In a letter to the church, the Pope said ...

The Vatican goes green: Pope announces new solar plant to power Vatican City Pope Francis waves during his weekly general audience in the St. Peter's Square at the Vatican, Wednesday, June 26, 2024.

This agri-voltaic installation, also known as "dual-use" solar power, involves using the land for both solar energy and agricultural production. For example, crops can be grown, livestock can be raised or pollinator habitats can be maintained under or next to the solar panels. In this way, the Vatican will become a "solar nation".

The initiative's objective is for Vatican City to function completely with renewable energy, which is a crucial

step in the fight against climate change. A Vision of Sustainability

The area belongs to the Vatican and already hosts a broadcasting center for Vatican Radio, which will also be powered by the new solar farm. The papal edict did not specify how big the farm will ...
