

What is Anguilla's energy mix?

Anguilla has a high solar potential and set a renewable energy mix target of 30% by 2030. Presently Anguilla's energy mix is comprised of only 4% renewable energy. Its electrical demand peaks at 16MW and its electricity prices are high relative to the rest of the Caribbean.

Where is Anguilla located?

Anguilla, a British Overseas Territory in the Eastern Caribbean, comprises a small main island and several offshore islets. The population of Anguilla is 15,000 and most reside in proximity to The Valley. Anguilla has a high solar potential and set a renewable energy mix target of 30% by 2030.

Who is Anguilla Electricity Company Limited (anglec)?

Anguilla Electricity Company Limited (ANGLEC) is an investor-owned electric utility with an exclusive license to produce, transmit, and distribute electricity in Anguilla.

How much does energy cost in Anguilla?

This profile provides a snapshot of the energy landscape of Anguilla, a British overseas territory in the Caribbean. Anguilla's residential utility rates start at \$0.16 per kilowatt-hour (kWh), below the Caribbean regional average of \$0.33/kWh.

Does Anguilla have energy consumption by sector?

Energy consumption by sector is unknown. The draft CCP facilitates the transition of Anguilla to an energy independent, climate resilient, energy-efficient, low-carbon economy.

Does Anguilla use oil?

Like many island nations, Anguilla is almost entirely dependent on imported fossil fuels (more than 99% of the island's electricity is generated using heavy fuel oil), leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

Darüber hinaus sorgt der Schiffsrumpf als Katamaran für stabile, optimale Gleitfähigkeiten und rundet das Gesamtbild ästhetisch ab. Derzeit befinden sich zwei neue Schiffe in Bau, die mit einer Kapazität von jeweils 180 Passagieren nach Stapellauf als große Fahrgastschiffe mit rein solar-elektrischem Antrieb Havel und Spree befahren werden.

This expensive, wildly fluctuating priced power is also extremely unclean with significant carbon emissions. Add to that, the fact that the region receives roughly 35% more sunlight per annum, and if you have the perfect formula for the ...
