

Solar panel business plan Jamaica

How much do solar panels cost in Jamaica?

As of Mar 2023, the average cost of solar panels in Jamaica is \$2.92 per watt making a typical 6000 watt (6 kW) solar system \$12,283 after claiming the 30% federal solar tax credit now available. This is lower than the average price of residential solar power systems across the United States which is currently \$3.00 per watt.

Can I buy a solar power system in Jamaica?

Most Jamaican homeowners do not have the necessary funds to buy a \$JMD 2,500,000 solar power system upfront so this is where financing comes in. If you can't afford the whole sum immediately, at least this way you only pay per month. Also ask if there are penalty fees for early payoff of your loan.

How to choose a solar company in Jamaica?

There are so many solar companies in Jamaica who will tell you how great they are. But based on actual user reviews, not advertising material, it can be hard to find the best one for you. So here are some tips that should help you when choosing a company: 1. Make sure that it is viable

What is the biggest solar project in Jamaica?

Paradise Park, a US\$65-million investment, is the largest solar project in Jamaica, which is projected to significantly decrease the country's dependence on fossil fuels, while helping the island to reach its sustainable development targets. The solar farm is designed to supply 37 megawatts of power.

Why should you invest in a solar panel system?

Investing in a solar panel system ensures that your home is ready for future investment in clean, green energy. Using a renewable source of energy also has long-term environmental benefits such as reduced pollution, decreased greenhouse gases and even reduced soil erosion from flooding caused by heavy rains.
