Solar panels are typically designed to have a 20- to 30-year lifespan -- although some can produce power for much longer than that. Damage from the elements can sometimes shorten this lifespan, and asset owners may find that they greatly improve their facility's output by repowering before a panel has reached its end-of-life.

If you are considering improving your home with solar panels, the next step is choosing a reliable company that provides top-quality solar panels and professional services. We are here to assist you with our summary of the ...
