This generator usually comes with solar panels, a solar panel battery, an inverter, and a battery charger. In a simpler term that most people say to define a solar generator, it is a portable power station that uses solar panels to provide electricity, instead of using traditional fossil fuels.

The battery can store the extra energy produced from solar panels during the day to avoid using electricity at a more expensive rate. The peak time-of-use (TOU) rates can be double the price compared to off-peak rates. In such a scenario, a solar battery storage system can come in handy for using electricity without having to pay such a high price.
