

While being a major oil producing country, the United Arab Emirates (UAE) has taken steps to introduce solar power on a large scale. However, solar power still accounts for a small share of energy production in the country. The country was the 6th top carbon dioxide emitter per capita in the world in 2009, with 40.31 tonnes, [1] but is planning to generate half of its electrical energy ...

Results show that the high initial costs and low expected price for electricity generated are driving reasons why photovoltaic systems are not being implemented in Abu Dhabi. A feed-in tariff rate of \$0.16/kWh is recommended to make large-scale PV systems profitable. Introduction. The United Arab Emirates (UAE) has an abundance of natural ...
